

# Rel-ID - Documentation strategy

Victor Ouko, Kai Kenklies, Patrick Seume  
Mentor: Kuldeep Singh

June 14, 2016

# Technical System Documentation

- ▶ **code documentation:** docstrings for all public modules, functions, classes, and methods.
- ▶ **follow guideline:** to ensure uniformity of docstrings follow Python's PEP 257 docstring conventions.
- ▶ **documentation frequency:** as each module, function, class, and method is written, simultaneously document it
- ▶ **task assignment:** documentation is done by author of code.
- ▶ **final result:** compile standalone documentation using Sphinx.

# End-user System Documentation

- ▶ **input:** explain what kind of queries can be answered.
- ▶ **output:** explain format of returned results.
- ▶ **how-to:** give short example of use-case.
- ▶ **quality:** state what the user can expect regarding precision and recall.

That's it
