

# Quality assessment of LOD for potential Dual Use

Ali Denno, Amal Amouri, Mohammad Denno, Ola Al Naameh

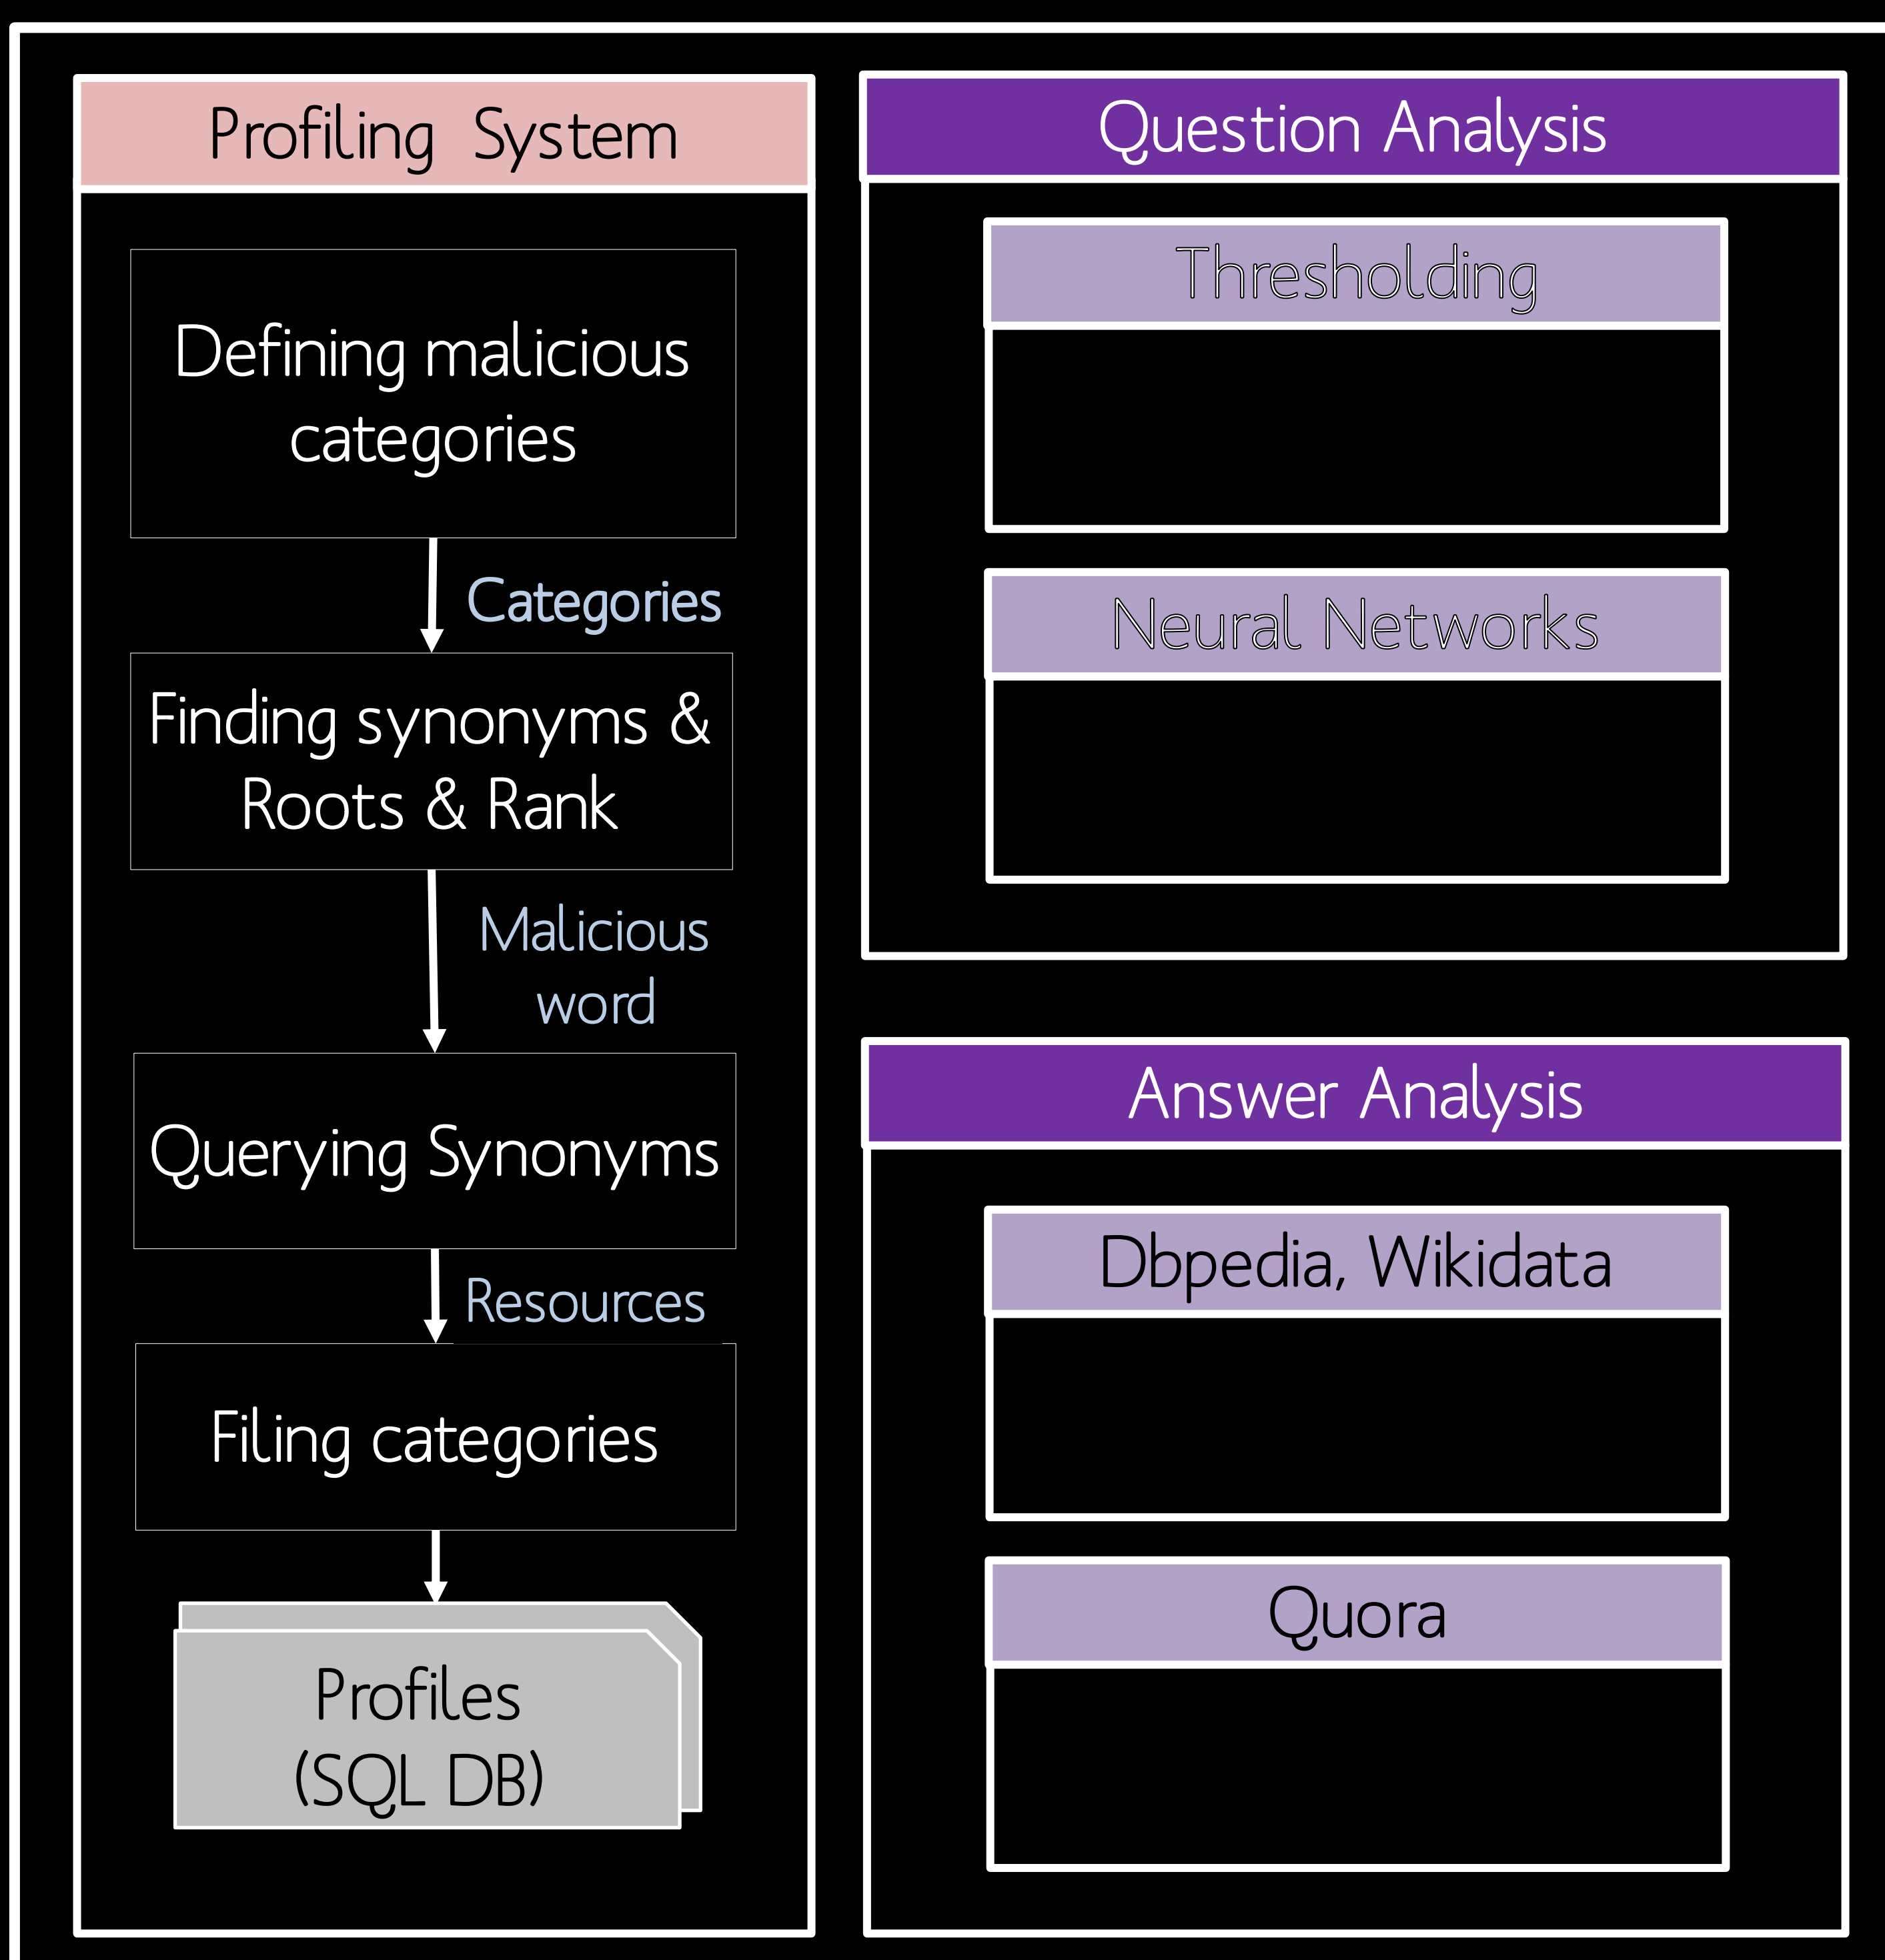

## Motivation

### ✧ Dual Use of questions

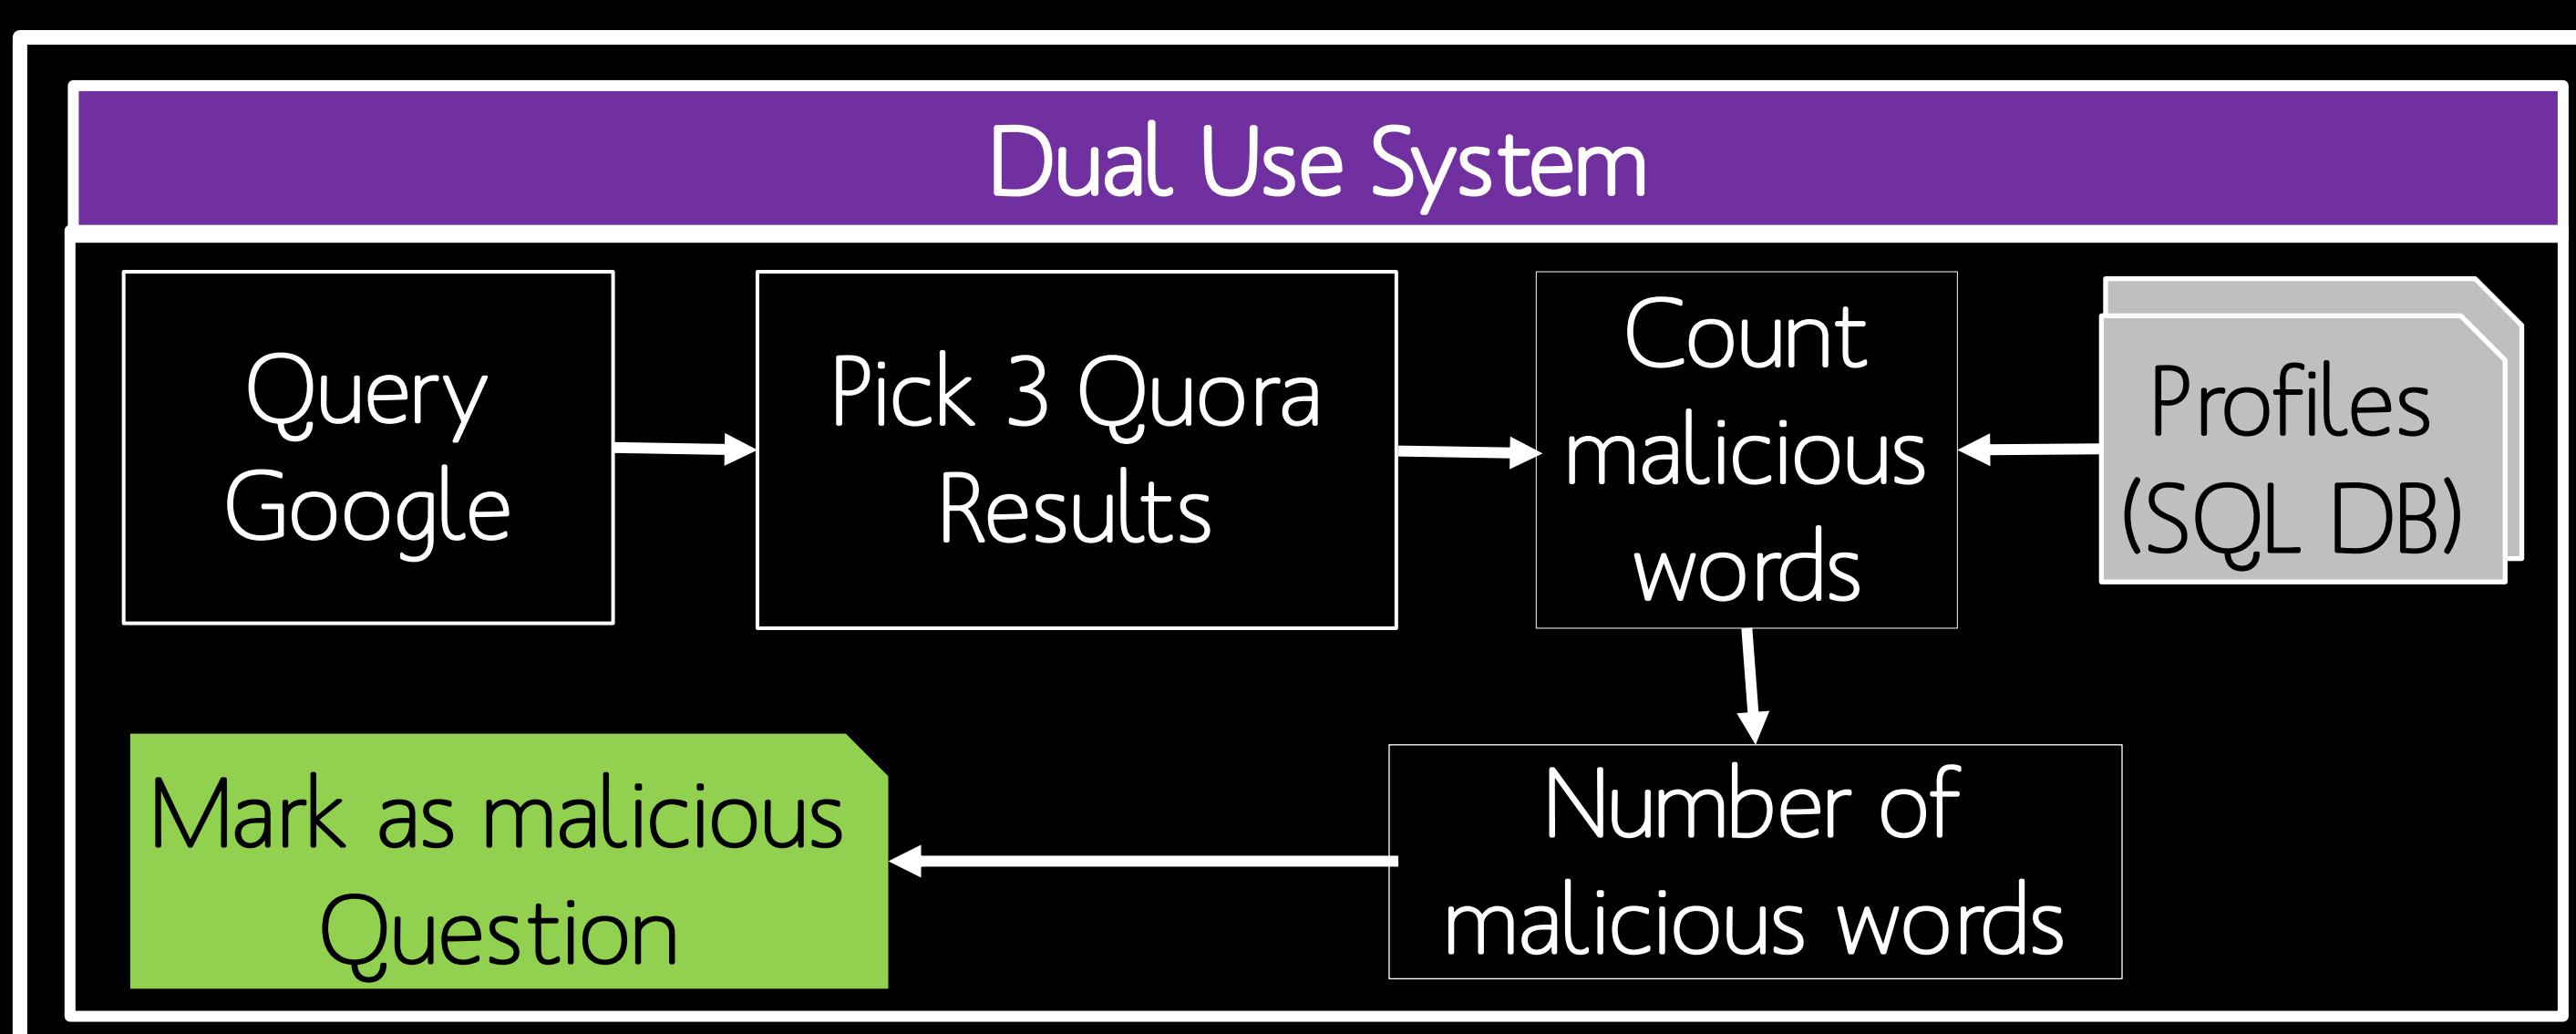

The following questions should be blocked:

1. Where is the nearest **nuclear power plant** from Koln airport?
2. How to make a **bomb** using a 2-cell **battery** or **soap**?
3. What is the nearest **military** base to **location X**?

## LOD System Structure

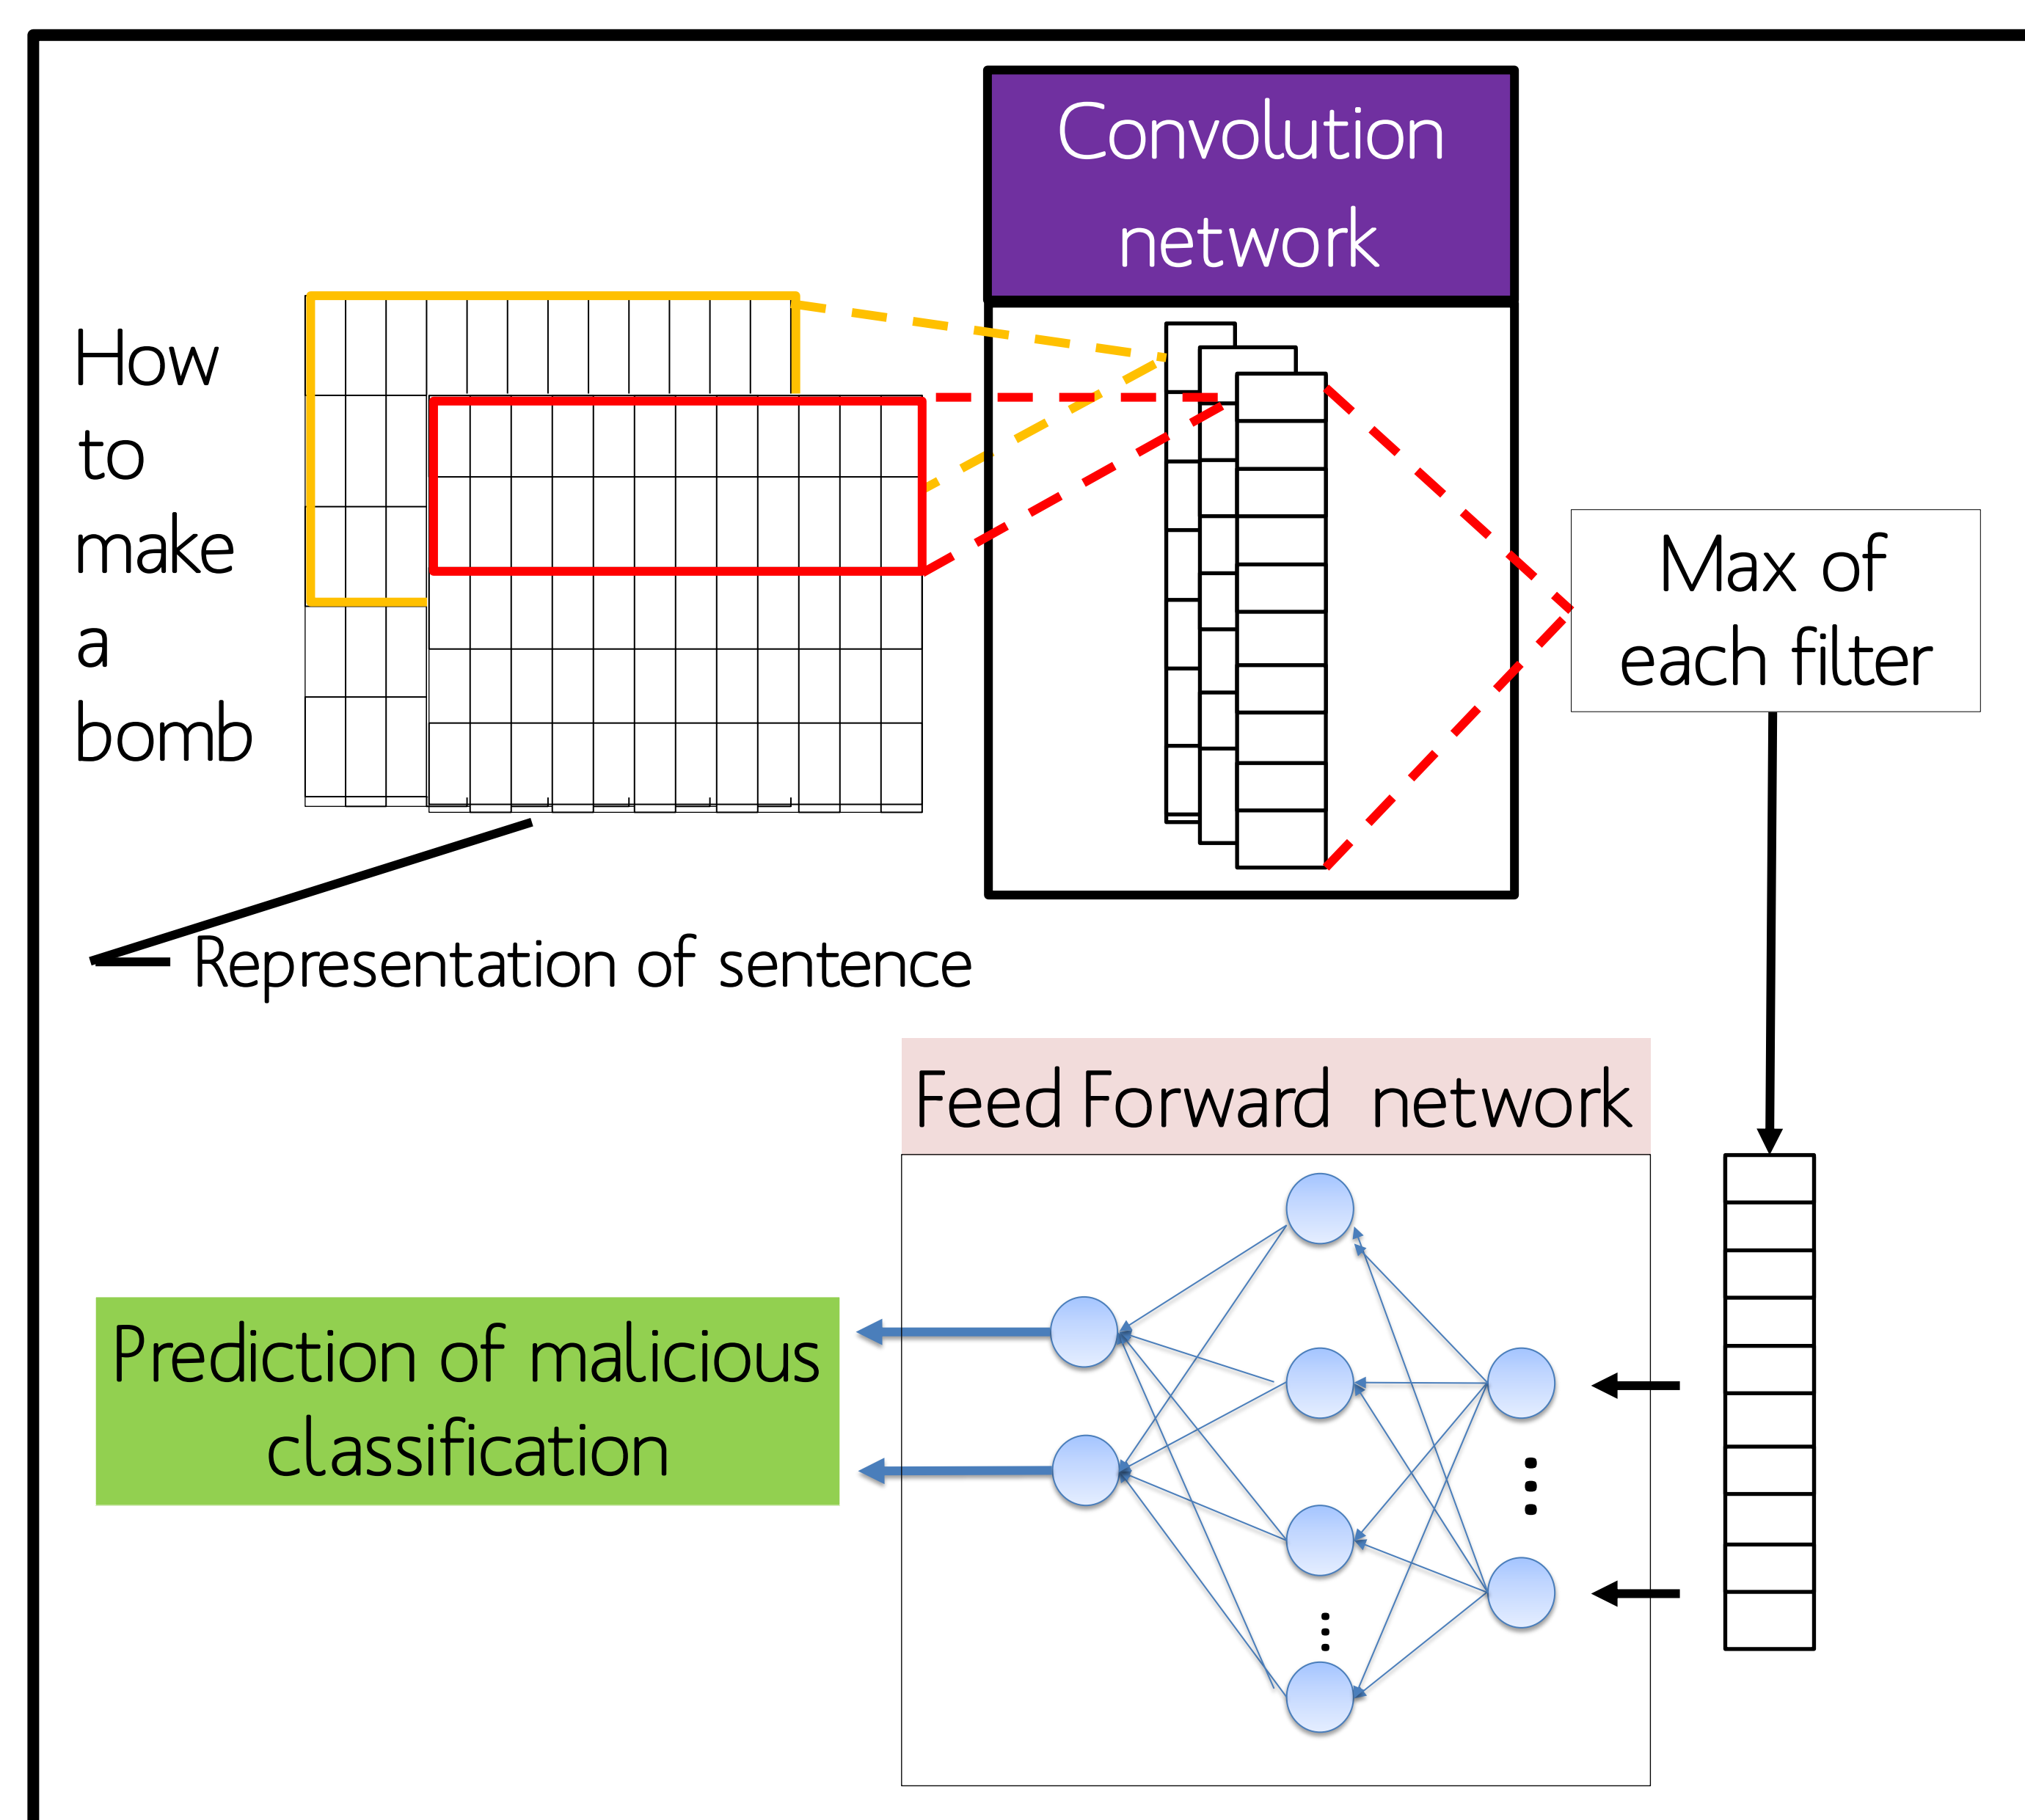

## Using Quora

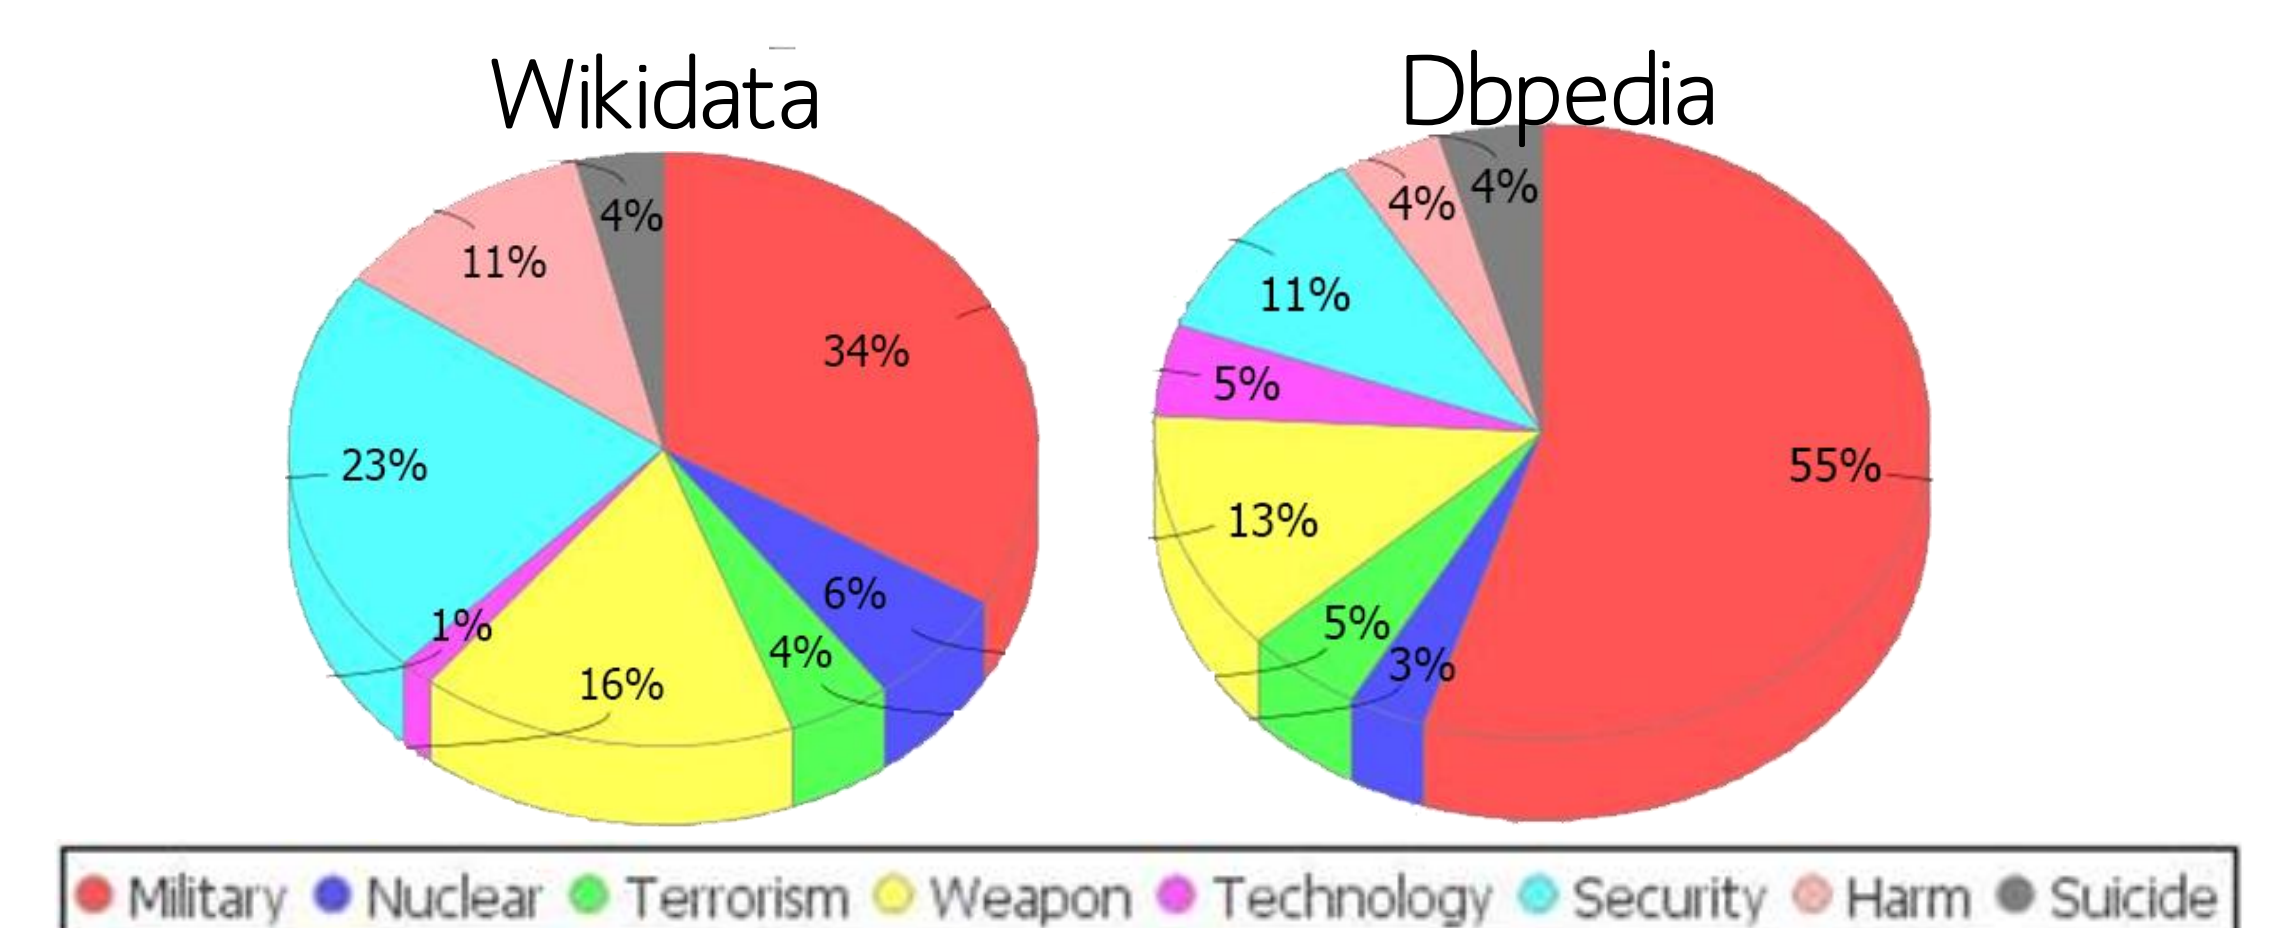

## Problems

- ✧ There is not enough resources in DBpedia and Wikidata
- ✧ It is hard to write a questions in SPARQL
- ✧ The system is not smart enough to find the difference between "How to kill an insect?" and "How to kill a person?"

## Convolutional Neural Network

## Results and Performance

## Virtual Machine Description

Hostname: **vm**

Software installed:

Installed on: Ubuntu 15.10

MySQL 5.6.31

TensorFlow
