Group F, Enterprise Information System, 4 May 2016

Use Case Diagram

Usecase

Name: Plot On Map

Primary Actor: Developer

Precondition: Geographical representation of enterprise data. Structure of the data should be according to the library standards.

Description: Developer will use the enterprise data (Buildings, Factories, Assembly Lines, etc) to plot it on OpenStreetMap through the use of Enterprise2Map javascript library.

Usecase

Name: Map Interaction

Primary Actor: User

Precondition: Data is plotted on the map.

Description: The output of the Enterprise2Map library will be used by some stakeholder to interact with the map, incorporate it into existing enterprise systems.
